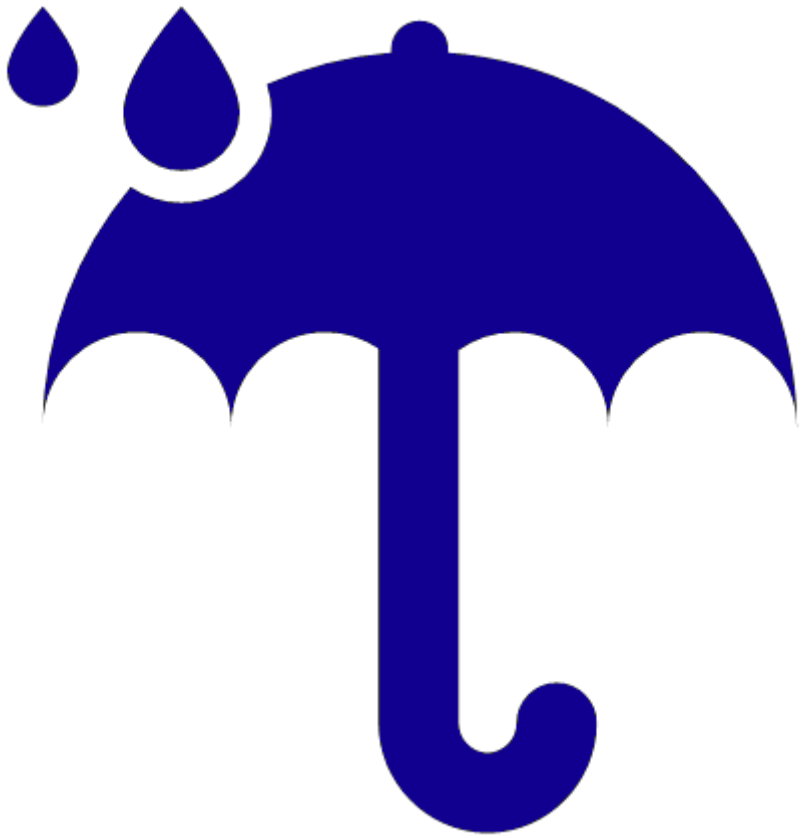
Three Steps to Financial Success

1. Define your **goals** and identify why you want to achieve them
2. Partner with a competent and caring **team** to help achieve your goals
3. Understand the importance of *protecting* and *growing* your personal **assets**



INSURE
(Protect Assets)

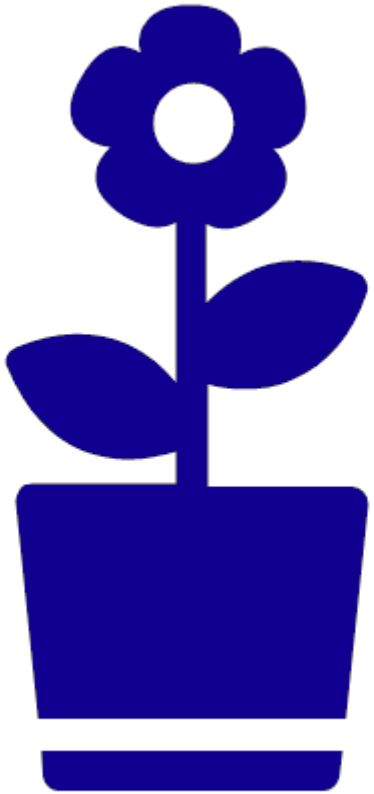
For educational purposes only. The firm does not sell insurance but may refer clients to licensed insurance persons appropriately as a courtesy.

KEY TAKEAWAY:

Confirm you have proper **insurance coverage** to *protect* your assets

Insure | 4 Actions to Protect Your Assets

1. **Complete estate plan** (will; power of attorney; trust)
   - Identify who will own your assets and make decisions for you
   - The government will decide if you do not have proper documentation ahead of time
2. **Acquire adequate insurance** (health; life; umbrella; specialty)
   - Even one unexpected accident or health issue could dramatically hinder your financial outlook
   - Plan for adequate coverage rather than the least expensive policy
3. **Identify long-term care plan** (insurance policy or family care)
   - Do you plan to take care of your parents or delegate that to someone else?
   - The average cost for long-term care in Colorado is several thousand dollars per month
4. **Support Medicare enrollment** (fill gaps in coverage)
   - MediCARE alone does not cover some significant areas like exclusive assisted living
   - MediCAID qualification may require a “spend down” of many personal assets (forced poverty)



INVEST
(Grow Assets)

KEY TAKEAWAY:

Confirm you have proper **investment management** to *grow* your assets

Invest | 4 Actions to Grow Your Assets

1. **Activate online financial plan** (assess expense needs; project future income)
   - Analyze and monitor your monthly cash flow to balance expenses with income
   - Estimate income from historical investment performance for future expenses
2. **Set up personal portfolio management** (general; emergency fund; IRA)
   - Establish auto-deposits into a balanced investment portfolio based on your goals and time horizon
   - Keeping your savings in cash can actually lose value over time if the yield is lower than inflation
3. **Maximize employer retirement matching if applicable** (401k; 403b)
   - Identify and contribute the amount applicable to maximize any employer matching
   - Choosing to not maximize employer matching is essentially forfeiting “free money”
4. **Start an education fund** (increase income potential or support family)
   - Support the opportunity for a higher paying job with higher education as needed
   - Ease the burden or impact of education costs by increasing the starting principal

Why Invest Now?

- **Compound returns can support financial goals** and grow personal wealth
- **Delaying could cause significant shortages** from missed gains and lost time
- **Keeping assets in cash guarantees lost value** if return is less than inflation

Inflation Significantly Erodes Purchasing Power Over Time

effects of 3% inflation on purchasing power

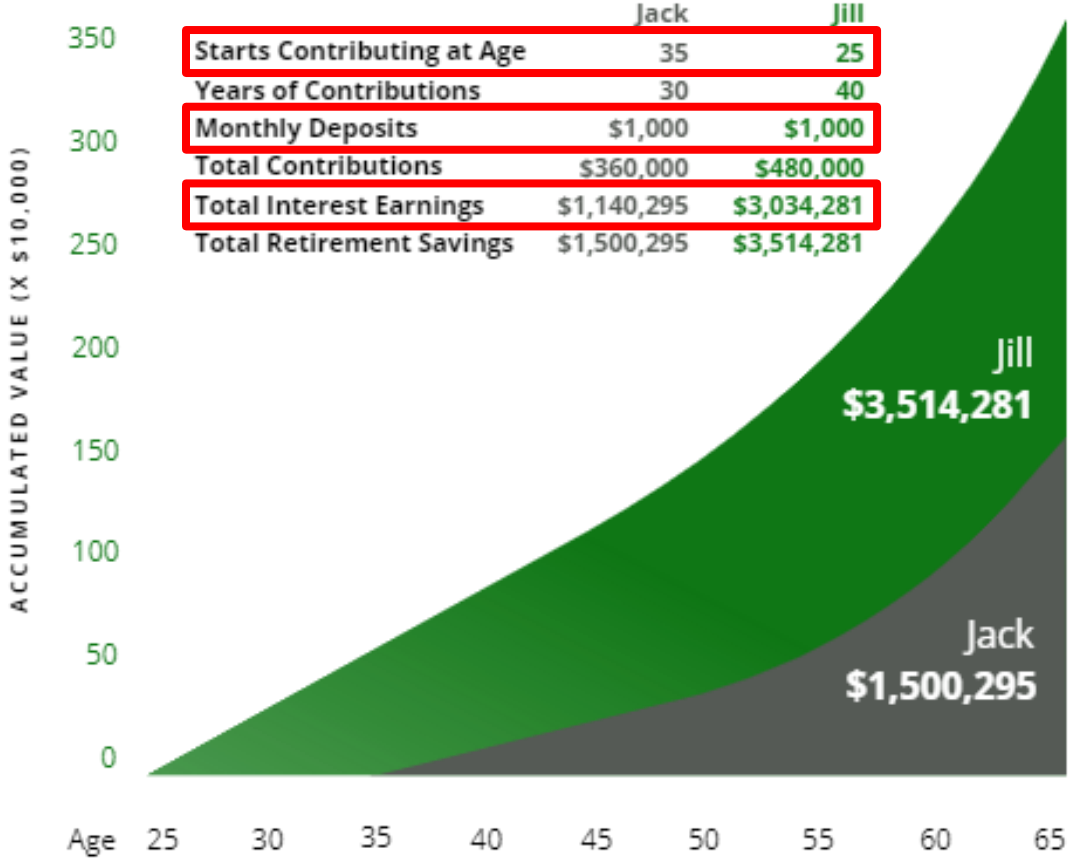
How the Power of Compounding Can Work for You

	Jack	Jill
Starts Contributing at Age	35	25
Years of Contributions	30	40
Monthly Deposits	$1,000	$1,000
Total Contributions	$360,000	$480,000
Total Interest Earnings	$1,140,295	$3,034,281
Total Retirement Savings	$1,500,295	$3,514,281



Assumption. Savings grow at a hypothetical 8% rate of return, compounded monthly. Your actual rate of return may vary.

Periodic investing does not assure a profit and does not protect against loss in declining markets.

Investing Should be a Three-Stranded Cord

- **Tax-Advantaged Retirement Account** (Roth or Traditional IRA as qualified):
  - Maximize annual contribution to an IRA (retirement)
  - Select Roth IRA or convert Traditional for qualified tax-free withdrawals
- **Non-Retirement Account** (any goal or timeline):
  - Customize with multiple portfolios to support various goals and timelines
  - Support maximum flexibility with no early withdrawal or tax penalties
- **Employer Retirement Plan** with Company Matching (if available):
  - Initially contribute up to the company match to maximize “free money”
  - Roll over prior employer plans to an IRA for convenience and performance potential

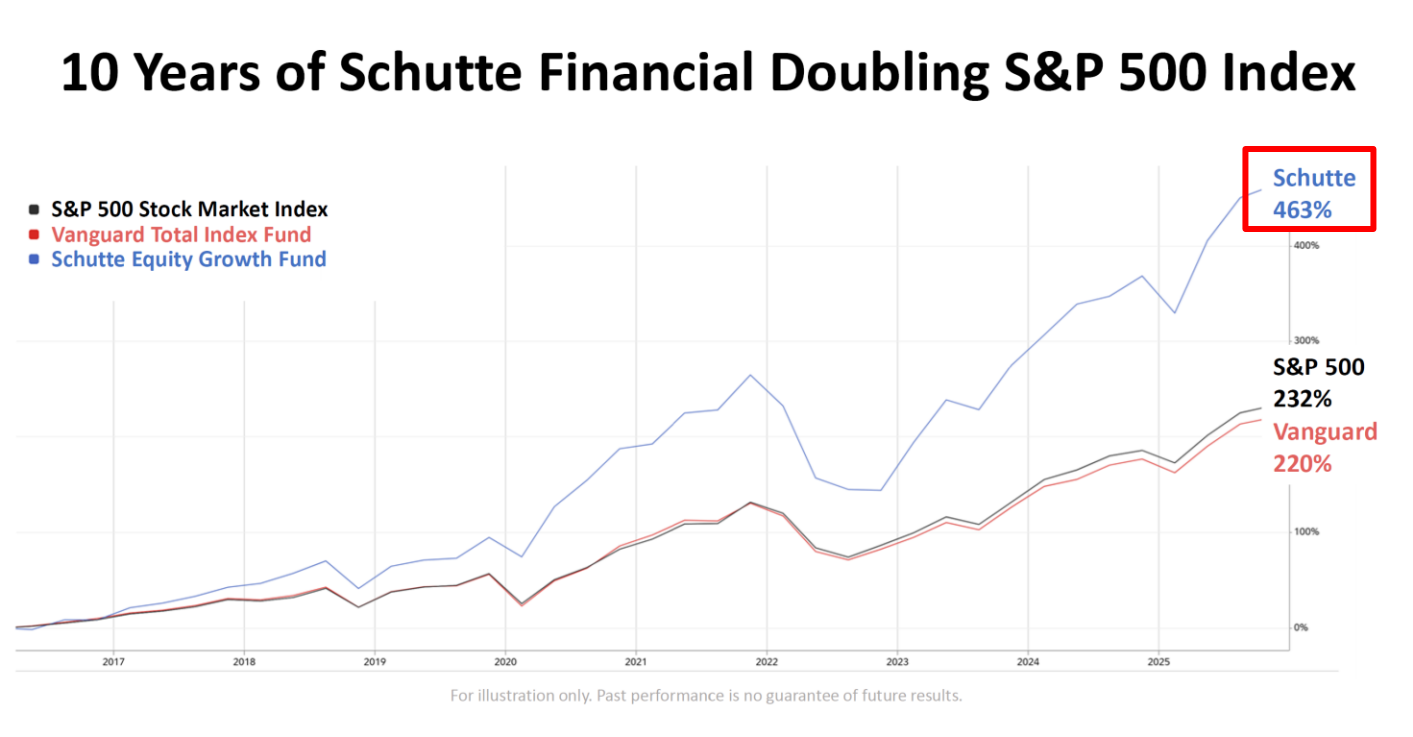
Note: Higher-performing investments in a taxable account can outweigh a retirement account even with matching

Reasons to Use Exchange Traded Funds (ETFs)

- Invest in **leading assets** (stocks, bonds, real estate) with **limited capital**
- **Diversify risk** like mutual funds with **advantages such as tax efficiency**
- Benefit from **often lower fund fees** resulting in **higher overall returns**

Schutte Financial has a top-performing growth ETF over 15 years per Google Finance.

Schutte Financial Equity ETF **Performance**



- Over double the S&P 500 Index
- Index fund allocated by experts
- Largest companies with global exposure
- 100 leading stocks (e.g. Apple, Microsoft)
- 10 different industry sectors
- Diversified growth with dividends

Your Future *With* or *Without* Schutte Financial

Without Schutte Financial

- **Mediocre return** from benchmarking performance
- **Time and stress** from managing personal investments
- **Risk of underfunding** financial goals from missed gains

With Schutte Financial

- **Maximum return** potential from leading performance
- **Personal freedom** from professional management
- **Confidence in funding** financial goals from past data

INVESTING **SMARTER**

DANIEL SCHUTTE MBA
Founder, Schutte Capital

With knowing people who were devastated by the dot-com Tech Crash of 2000, and being personally impacted by the Housing Crash of 2008, I wanted **more than a conventional buy-and-hold approach** to investing. After many years of researching, synthesizing, and testing, I developed a proprietary trading algorithm to **capture market trends** yet **avoid catastrophic dips**, while disregarding the noise of novice day traders. The strategy nearly **doubled my real account** with initial live testing in 2019. Serving as evidence that the approach wasn't random, it completely avoided the COVID Crash in 2020, then nearly doubled my account for the second year in a row on the upswing. From there, I founded Schutte Capital as our accelerated fund in 2021, which was awarded **Hedge Fund of the Year** for its strategy class **based on top returns** with **performance data from Bloomberg.** For over 5 years, our strategy has been enhanced with backtesting to the dot-com crash from 2000-2002, which actually shows a profit despite the stock market plunge. I'm grateful and excited to help others with a smarter alternative to **invest with confidence** despite the headlines and **provide for those they love.**

- **Assisted investors since 2003** from personal passion for helping others
- **Traded securities successfully for over 20 years** before establishing fund
- **Managed over $50 Million in assets** as a Signals Intelligence and Operations Officer at Headquarters in the United States Marine Corps
- Earned an **MBA degree** including education in personal and corporate finance along with **Series 7 and Series 66** financial services licenses
- Founded *Schutte Financial* in 2016 as a **Registered Investment Advisor** and fiduciary for clients seeking independent management and advice
- Developed a **proven strategy** from published research and objective data with historic **returns significantly exceeding other funds**
- Founded *Schutte Capital* in 2021 as an actively-managed fund for accredited investors and institutions seeking **accelerated returns**
- Recognized by **Fortune**, **Bloomberg**, **Nasdaq**, **Investopedia**, and **Business Insider**
